Queens of Code Online Talks

June 4, 2020 2:00 PM

June 11, 2020 2:00 PM

The Queens of Code will be presenting four talks about NSA's Computing Women from the 60s, 70s, and 80s as part of the Cyber Center for Education & Innovation (CCEI) series on the NEPRIS platform. These computing pioneers contributed to early technology development and the national defense—a secret they've kept for over 50 years. The programs are free, NEPRIS registration is required. The talks are geared to middle and high school students, but all are welcomed.

June 4, 2020, 2:00 PM--Meet the Queens of Code. We will introduce the Queens of Code and share stories from their careers in technology at NSA.

https://nepris.com/sessions/session/detail/72553

June 11, 2020, 2:00 PM--PreQueen stories about growing up as "smart girls" and first experiences with early computers.

https://ccei.nepris.com/sessions/session/detail/72773

Talks 3 and 4 will be scheduled later in the summer.

The Queens of Code's article "First Encounters of a Binary Kind," will be the cover story for the June issues of the IEEE Annals of the History of Computing Journal. The article shares the stories of twelve queens working with early computers at the National Security Agency.
