They've kept their secrets for 50 years or more.

Three Queens of Code who lived in Maryland during their careers now share their stories about the National Security Agency's computing women.

Join us virtually on January 20, 2022 at 4:00 p.m.

The event is free. We welcome donations, which will support STEM activities of the National Cryptologic Foundation and MWHC's 2022 programs.

Register with Eventbrite.

Queens of Code is a women's technology history project that collects stories, experiences, and insights from women who worked in information technology at National Security Agency in the 1960s, 70s, and 80s.

Join NSA Queens of Code Laura Nelson, Kathy Jackson and Eileen Buckholtz in this virtual session. They will share their experiences of being technology pioneers at NSA as well as advice for students considering a STEM career.

Queens of Code is bringing the NSA's computing women out of the shadows — allowing them to tell their stories and claim their rightful place in America's (and Maryland's) "HERstory."

The zoom link will be sent to registrants on January 19, 2022.
50% of all donations will go to support STEM activities of the National Cryptologic Foundation and 50% to MWHC.
